DETAILED ACTION

Claim Objections

1. Claims 6, 12-14, 19, 22-23, and 38 are objected to because of the following informalities:

Claim 6, line 2, "a" should be replaced by "the".

Claim 12, line 9, "a" should be replaced by "the".

Claim 19, "(S1NR)" should be replaced by --(SINR)--.

Claim 22, line 3, "a" should be replaced by "the".

As per claim 23, the dependency should be changed from "21" to "22" because of the recitation "first loop" in claim 22 and "second loop" in claim 23.

Claim 38 depends on claim 36. However, most of the limitations of claim 38 are included in claim 36. Therefore, claim 38 should be amended to remove any redundant limitations, otherwise recited in the base claim 36. For instance, claim 38 can be amended as follow:

--38. The digital signal processor of claim 36, wherein the loop filter is further operative to scale the error metric of the selected signal instance with a weight.—

note that any claim whose base claim is objected is likewise objected.

Appropriate correction is required.

2. This application is in condition for allowance except for the formal matters noted above.
